

**Have you ever wondered if your child is on target developmentally?
Now you can find out with just a quick screening at no cost to you!**

The first five years are critical in a child's life. This is the most important time to get your child support for a developmental delay or special need.

Children develop skills, or "milestones," at their own pace. How is your child doing? We only need 10-20 minutes to check with the **Ages & Stages Questionnaires®, Third Edition**. Your ASQ-3™, results will help you see if your child's developmental progress is on time and alert you to any potential concerns that you can talk over with your health care provider.

*Please note: **ASQ-3™** is designed for screening, not diagnosis. It is a quick check for children from birth through age five. If your child is age six or older, please discuss his or her development with your child's health care provider, your local school district, or your child's teacher.*

Please visit the following web address to complete the **ASQ-3™**online:

http://es.easterseals.com/site/PageNavigator/ntlc10_mffc_homepageasq.html

You will receive an email with the results of your child's screening within two weeks. Easterseals is proud to be able to offer this online screening to families with young children for free. Thank you for taking the time to invest in your child's future development!
